Technical Skills

Bash Scripting • Unix-Linux OS • SNMP Technology • MySQL – Database • Networks • Java • HTML • TCP/IP
• UML • MATLAB • Automation • Python • Cloud Computing • Web-services • DevOps • Rest APIs • Azure •
Docker • Kubernetes • MS Project

Professional Development Project

Computer Engineering

Detection of copy-move attacks on digital images using MATLAB based on DCT. The project is about detecting if there is any modification on a particular picture by • Dividing the picture into the three basic colors (Red-Green-Blue). • Divide each color into overlapping fixed-size blocks. • Apply DCT on each block. • Use zigzag scanning to find the distance between pairs. • Sort distances in ascending. • Determine if there is a positive match.

Languages

Arabic -Native • English -Bilingual Proficiency

Interests

• Reading • Programming • Robotics • Self-Learning • Data Warehouse • Automation • Scuba Diving
