- Ability to work and explore needed tools required to accomplish the job

Technical skills

- Backup and recovery consultation (consult level)
- Microfocus data protector installation and operation (consult level)
- Database architecture and technologies knowledge (Senior level)
- Oracle Data base installation ,administration and backup and recovery(Senior level)
- SQL Data base installation ,administration and backup and recovery(MID-Senior level)
- SQL Data base scripting, development ,coding and tuning(beginner level)
- Team lead and supervisor (Mid-Senior level)
- Technical Project management (Mid-Senior level)
- Customer technical account management (Mid-Senior level)
- Technical support engineer (Mid-Senior level)
- Operations management (Mid level)

Companies work with

- TATA 26/4/2022 – present (official join date 11-5-2022)
- STC solutions 1/4/2021 – 26-4-2022
- HPE Saudi Arabia 9/5/2018 – 1/4/2021
- National computer systems company “NATCOM” (Saudi Arabia)
- Computer & communications systems,(Saudi Arabia) 25/9/2009 -25/5/2013
- Computer & communications systems(Jordan) 17/3/2005 -9/2009
- Jockey Electronics Company (Jordan) 1/7/2002- 1/11/2004
- Ejad communications company (Saudi Arabia) 27/3/2004-7/9/2004
-

Concepts Knowledge

- Data center structure, technologies and component
- Project management
- Operations management
- Backup and recovery, disaster recovery concepts
- Veeam backup solution
- Commvault backup solution
- Storage ,Servers,SAN & NAS architecture knowledge
- Operating systems (windows, Linux and Unix)
- Databases and application architecture and life cycle
- Hyper Converge technology
- Claude Technology

Experience:

STCS \TATA (Resident Backup and Recovery Consultant at ZATCA) 1/Apr/2021 – present

Designation: Veeam solution Backup and Recovery Consultant\Operation

Responsibilities:

- Design and architecture of backup solutions
- Operation and configuration of Veeam solution for backup and replication
- Implementation and configuration of Veeam backup solution (Hyper-V, VMware, Windows, Linux and)
- Configuring backup destination repositories scale out and single (Nimble, StoreOnce, RIFS, NFS...etc.)
- Installation and configuration of required components and scripts for database online backups (Oracle, SQL, Exchange,etc.)
- Configuration of linux plugins and agents
- Creating and schedule backup and copy policies
- Creating and configuring catalyst backup jobs CoFC and CoE
- Creating and configuring copy jobs between different kind of backup destinations
- Managing tape devices and copy jobs related
- Restore backups for customers upon request
- Performance tuning
- Patching and upgrades
- Licenses activation and implementation
- Trouble shooting diagnostics and problem solving
- handling cases with Veeam support and apply action plans required
- backup and replication testing scenarios to validate backups and replication

Managed Environment Components Onsite:

- 6 backup servers version 10 and 11
- 2 backup servers controlling replication of 100 + VMs from HQ to DR and DR to HQ
- 2 veeamone report servers
- 2 backup repositories handling 500 TB of Nimble storage as production ENV first backup destination
- 4 store once appliances of 300 TB as backup destination for Prod ENV None Prod ENV backups
- One Data Domain appliance of 1.3 PB as backup destination for second backup copy
- 2 MSL with 14 tape drives for as offline backup destination for offsite copies
- 200 + backup proxies and gateways for storeonce and file shares backups
- Backup and copy jobs for 1500 VMs
- Backups and copy jobs for 100 oracle databases
- Backups and copy jobs for 50+ SQL databases clusters
- NAS backups from netapp storage with 400M files
